About Me

Experienced Software Engineer with strong foundations in **C/C++, Data Structures, and Algorithms**. Proven ability to build performance-critical systems and work with large, complex codebases. Focused on efficiency, robustness, and system-level optimizations.

Education

M.Tech in Computer Science & Engineering - 8.0 CGPA 2025 - 2027
Netaji Subhas University of Technology

B.Tech in Computer Science & Engineering - 8.71 CGPA 07/2020 - 06/2024
Dr. B. C. Roy Engineering College

Work Experience

RPA Developer *Century Plyboards(I) Ltd.* 07/2024 - 07/2025

- Contributed significantly to **Project SWAYAM**, a digital initiative by Century to **automate SCM processes** and Excel report generation using **Python and Machine Learning**.
- **Automated business communication processes** across all branches and all stakeholders **pan-India**.
- Reduced attrition rate by **27%** among the field staff by building a field reporting solution for better monitoring of joint field activities.

Unity/Unreal Engine Intern (C++/C#) *Experimental Technologies Private Limited* 08/2022 - 10/2022

- Developed performance-sensitive gameplay systems using **C++**.
- Implemented multi-agent AI pathfinding algorithms with focus on correctness and efficiency.
- Scaled enemy AI systems, facilitating support for 20+ concurrent AI agents.

Skills

Languages: C, C++, C#, Java, Python
Systems & Tools: Git, GitHub, Linux
Database: MySQL
CS Fundamentals: DSA, OS, OOP, DBMS, AI, Machine Learning, Deep Learning

Projects

Blaster - Third Person Battle Royale Game (Unreal Engine 5)

- A scalable third-person **multiplayer shooter game** that can handle up to **100 players**.
- Implemented industry standard features like **Server-side rewind**.
- Developed using **C++** for **performance optimization** and **core gameplay mechanics**.

GED-I: Graph Neural Network-Based Federated Intrusion Detection System

- Developed a privacy-preserving intrusion detection framework integrating **GNNs** and **Federated Learning** for IoT network security.
- Achieved **97%** classification accuracy and **0.97** F1-score, demonstrating effective detection of diverse network attacks.
- **Authored a research paper** detailing the proposed framework and experimental findings to an academic journal.

GRAViT - Graph-Retrieval Augmentation for Vision and Text (M.Tech Thesis)

- Designed a **graph-based multimodal retrieval** pipeline for scientific-paper question answering, building upon an **NVIDIA** research paper.
- Investigating **GNN-based** integration of textual and visual evidence with **VLMs** for improved retrieval and contextual understanding.

Achievements and Certificates

- **IEEE Publication** - Published a **peer-reviewed research paper** in a reputed IEEE conference on **IoT and ML** based analysis of plant growth in indoor and outdoor environments.
- **NVIDIA** - Fundamentals of Deep Learning (Certificate of Competency), November 2025
- **LeetCode** - Ranked **13,100** globally with Rating of **1800+.**
- **GATE 2025 Qualified** - Computer Science as well as Data Science & AI.
- **NSUT Placement Coordinator** - Coordinated placement processes, managed recruiter interactions, and ensured smooth execution of placement drives of 500+ students.
